Blueberry Dixie

A late season fruit, also known as the 'vaccinium corymbosum', is an intensely flavoured variety, producing fruit in August and September as well as fragrant foliage which is highly attractive to bees and other pollinators. Grows to a mature height of one metre, supplied in 2L pot plants.

£7.50

Jostaberry

A delicious cross between a blackcurrant and a gooseberry. Vigorous growing, producing dark reddish-black fruit slightly larger than a blackcurrant in late July. 9cm pot plants supplied.

£4.50

Damson Merryweather

Producing a large black fruit for bottling, jams or dessert. Ripens late August. Grafted onto St Julien root stock which is not strictly dwarf, which no plum is, but is easily manageable. Two-year-old bare root trees supplied.

£12.50

Loganberry thornless

Across between a raspberry and a blackberry. It produces berries which are slightly longer than a raspberry, with a sharper, tarter flavour. Loganberries are sturdy, more disease and frost resistant than many other berry hybrids, and will usually produce fruit throughout August and September. Supplied in 2L pots.

£7.00

Raspberry Autumn Bliss

Most popular autumn flowering variety. Short sturdy canes. Good flavour.

Pack of 10 canes

£13.50

Raspberry Malling Jewel

Mid-season fruiting raspberry cane - July/August.

Pack of 10 canes

£13.50

Apricot Large Early

A self-fertile Apricot, one of the most hardy and reliable varieties on the market. It is recommended to grow in a south facing sheltered position. We supply as a semi-dwarf variety, St Julian A rootstock. Two-year-old bare root trees supplied.

£14.50

Peach Peregrine

Fruit yellow with dark red blush from late August. Root wrapped tree supplied.

£15.00

Patio Nectarine

Will produce fruit in the first year after planting. Suited to a spacious pot on the patio. Grown on very dwarf root stock which will produce mini patio fruit.

£13.00

Cranberry

Cranberries have been feted as the fruit for a healthy lifestyle. Like blackberries, very high in Vitamin C. Helps many medical ailments. Height 15cm. Spread 30-40cm.

£5.00

Cherry Sunburst

Recently introduced variety which was the first self-fertile black sweet cherry. Excellent fruit produced in July. Grafted onto dwarf Colt root stock.

£13.50

Cherry Morello

Very hardy. Has a compact habit and is the best for cooking. Dark red fruit in August - September. Grafted onto dwarf Colt root stock. Self-fertile.

£13.50

Red Devil

A fantastic new apple tree which produces crisp fruit with unusual red flesh. Very juicy with a hint of strawberry. Attractive pink/red flowers. A great self-fertile apple tree, pick fruit in September. Supplied as a 1-year maiden fruit tree at 120cm,

£15.00

Apple Egremont Russet

Richly flavoured keeping dessert apple. Ripens in October-November. Two-year-old tree grafted on dwarf root stock M26

£15.00

Apple Laxton's Superb

Self-fertile. Mid to late flowering and late fruiter. Sweet and aromatic. A true old-fashioned variety. Two-year-old tree grafted on dwarf root stock M26

£15.00

Pear Beurre Hardy

Large, distinctively flavoured pear with rose-water scent. A strong grower and very hardy.

Will cross pollinate with Doyenne du Commice. Late ripening

Supplied as two-year-old tree grafted onto semi-dwarf root stock – Quince A

£13.00

Pear Doyenne de Commice

Where two varieties are required and there is space only for one tree. It is quite pleasing also to see two varied varieties on the same bush. Conference and Louise Bonne De Jersey. Grafted onto Pear Pyrus communis stock, 100cm stem, bare root plants supplied.

£13.00

Pear Beth

Pear Beth is an excellent English garden variety due to the excellent taste, compact habit and cropping. Supplied as two-year-old trees grafted onto semi dwarf root stock, Quince A.

£13.00
